

L^AT_EX 2_ε Document Styles for the University of Southampton

File version v2.0, dated 2018/12/20

Edward Longman with prior work by Steve R. Gunn

Printed February 27, 2019

1 Quickstart

This guide assumes you have installed MiKTeX or TeX live distributions. It also requires having the program “make” for producing the templates again.

The folder labelled `tex-mf` should be installed in your local tex files source or whatever your tex distro uses.

The Templates have been built for the Department of Electronics and Computer Science in the Faculty of Engineering and Physical Science at the University of Southampton.

The basic settings for University, Faculty and School are explained in Section 6

If a user only wishes to change the file for their thesis it is probably easier to navigate to the class file labeled `uosthesis` and change the department and faculty naming there. This will be located in the subdirectory where you unzipped the files under `tex/latex/uosdocs/`

2 Description

These L^AT_EX 2_ε document classes are designed to produce thesis, mini-thesis, progress, project, report, GDP report and GDP summary report documents which conformed to the University of Southampton guidelines of April 2001. They were updated in Jan 2019 to conform to changes in those guidelines. Specifically copyright and authorship declaration changes. They are based on the document class `book`, but modify some of its layout decisions. An article class is also provided which is based on the document class `article`.

3 The DOCSTRIP modules

The following modules are used in the implementation to direct DOCSTRIP when generating the external files:

thesis	produce the <code>uosthesis</code> document class
minithesis	produce the <code>uosminithesis</code> document class
progress	produce the <code>uosprogress</code> document class
project	produce the <code>uosproject</code> document class
report	produce the <code>uosreport</code> document class
article	produce the <code>uosarticle</code> document class
gdp	produce the <code>uosgdp</code> document class
gdpsummary	produce the <code>uosgdpsummary</code> document class
testthesis	produce an example thesis
testminithesis	produce an example minithesis
testprogress	produce an example progress
testproject	produce an example project
testreport	produce an example report
testarticle	produce an example article
testgdp	produce an example GDP report
testgdpsummary	produce an example GDP summary report
introduction	produce an example introduction chapter
conclusions	produce an example conclusions chapter
appendix	produce an example appendix chapter
figure	produce an example figure file
definitions	produce an example definitions file
references	produce an example references file
bst	produce a bibliography style file
driver	produce a documentation driver file

4 Implementation

The checksum is to determine if there has been a truncation in the file during transmission over a network

The class has a custom option to define what colours should be used for links. This option defines `sotoncolour` to use UoS palette colours. Colour Code taken from <http://edshare.soton.ac.uk/10481>

All options are passed on to the `book` or `article` class.

```

1 <{*thesis | minithesis | progress | project | report | article | gdp | gdpsummary}>
\baseclass
2 %% ----- Class/Formating Adjustment -----
3 %% Adjust the book class to match the requirements
4 %% Set spacing, line and paragraph options
5 %% Set LaTeX builder options (work break penalties etc.)
6 <{*thesis | minithesis | progress | project | report | gdp | gdpsummary}>
7 \def\baseclass{book}
8 </thesis | minithesis | progress | project | report | gdp | gdpsummary>
9 <{*article}>
10 \def\baseclass{article}
11 </article>
12 \RequirePackage{xcolor}
13 \colorlet{linkBlue}{blue}
14 \colorlet{custGray}{gray}
15 \colorlet{chapRed}{red}

```

```

16 \DeclareOption{sotoncolour}{
17 \definecolor{sotonMarineBlue}{RGB}{1,67,89} % Soton marine blue (P 7469C)
18 \definecolor{sotonGrey}{RGB}{153,153,166} % Soton grey (P 443C)
19 \definecolor{sotonRed}{RGB}{171,18,16} % Soton Red (P 484C)
20 \colorlet{linkBlue}{sotonMarineBlue}
21 \colorlet{custGray}{sotonGrey}
22 \colorlet{chapRed}{sotonRed}
23 }
24 \DeclareOption*{\PassOptionsToClass{\CurrentOption}{\baseclass}}

```

`\@checkoptions` Before we can process the options we must deal with a small problem. That is, we want to change the default options of the book or `article` class to `a4paper` and `11pt` or `12pt` but the macro `\ProcessOptions` used by the book or `article` class processes the options in the order specified in the file. Because `a4paper` is the first of the paper sizing options it will be overridden by any user defined option. But the same is not true of the font size option `11pt` or `12pt`. To remedy this we define a macro `\@checkoptions{<default>}{<option-list>}` which checks to see if any options in `<option-list>` have been specified and if not adds `<default>` to the option list.

```

25 \def\@checkoptions#1#2{
26 \edef\@curroptions{\@optionlist{\@currname.\@currxt}}
27 \@tempswafalse
28 \@tfor\@this:=#2\do{
29 \expandtwoargs\in@{,\@this,}{,\@curroptions,}
30 \ifin@ \@tempswatruer \@break@tfor \fi
31 \let\@this\@empty
32 \if@tempswa \else \PassOptionsToClass{#1}{\baseclass}\fi
33 }

```

With this macro at our disposal we can continue to process the options

```

34 (*thesis | minithesis | progress | report | article | gdp | gdpsummary)
35 \@checkoptions{11pt}{10pt}{11pt}{12pt}
36 \thesis | minithesis | progress | report | article | gdp | gdpsummary)
37 (*project)
38 \@checkoptions{12pt}{10pt}{11pt}{12pt}
39 \project)
40 \PassOptionsToClass{a4paper}{\baseclass}
41 \ProcessOptions\relax

```

and load the book or `article` document class with `A4` as the default paper size.

```
42 \LoadClass{\baseclass}
```

4.1 Banner

`\bhrule` Provide a function to produce a banner on the output making the location of the current section simpler.

```

43 \newcommand\bhrule{\typeout{-----}}
44 \newcommand\btypeout[1]{\bhrule\typeout{\space #1}\bhrule}

```

4.2 Date

`\today` This macro uses the \TeX primitives `\month`, `\day` and `\year` to provide the date of the \LaTeX -run in a suitable format.

```
45 <*thesis>
46 \def\today{\ifcase\month\or
47   January\or February\or March\or April\or May\or June\or
48   July\or August\or September\or October\or November\or December\fi
49   \space \number\year}
50 </thesis>
```

5 Document Layout

5.1 Font

```
51 %% \usepackage[T1]{fontspec}
52 %   Set font for copyright statement body text
53 \usepackage[defaultsans]{droidsans}
54 %   Set a particular style of font for the thesis. A font that has smallcaps
55 \usepackage{mathpazo}
56 %%\usepackage[T1]{fontenc} %This may not be necessary for english only text
```

5.2 Spacing

Load the `setspace` package so that spacing can easily be set. The text in all three styles is set to one and a half spacing, paragraphs not indented, and a newline between paragraphs.

```
57 \usepackage{setspace}
58 <thesis | minithesis | progress | project | report | gdp | gdpsummary>\onehalfspacing
59 <article>\singlespacing
60 \setlength{\parindent}{0pt}
61 \setlength{\parskip}{2.0ex plus0.5ex minus0.2ex}
```

5.3 Margins

Load the `vmargin` package to setup the page dimensions.

```
62 \usepackage{vmargin}
63 <*thesis | minithesis | progress | project | report | gdp | gdpsummary>
64 \setmarginsrb          { 1.5in} % left margin
65                       { 0.6in} % top margin
66                       { 1.0in} % right margin
67                       { 0.8in} % bottom margin
68                       { 20pt}  % head height
69                       {0.25in} % head sep
70                       { 9pt}   % foot height
71                       { 0.3in} % foot sep
72 </thesis | minithesis | progress | project | report | gdp | gdpsummary>
73 <*article>
74 \setmarginsrb          { 0.8in} % left margin
75                       { 0.6in} % top margin
76                       { 0.8in} % right margin
77                       { 0.8in} % bottom margin
78                       { 20pt}  % head height
```

```

79             {0.25in} % head sep
80             { 9pt} % foot height
81             { 0.3in} % foot sep
82 </article>

```

5.4 Breaks

Control how pages and lines are broken.

```

83 \raggedbottom
84 \setlength{\topskip}{1\topskip \@plus 5\p@}
85 \doublehyphendemerits=10000 % No consecutive line hyphens.
86 \brokenpenalty=10000 % No broken words across columns/pages.
87 \widowpenalty=9999 % Almost no widows at bottom of page.
88 \clubpenalty=9999 % Almost no orphans at top of page.
89 \interfootnotelinepenalty=9999 % Almost never break footnotes.

```

5.5 Fancy Page Headers

Setup the the default fancy page headers with an underlined header containing chapter, name and page number.

```

90 \usepackage{fancyhdr}
91 % Help from https://texblog.org/2007/11/07/headerfooter-in-latex-with-fancyhdr/#comment-4783
92 \fancyhead[LE]{\textrm\thepage}
93 \fancyhead[LO]{\fancyplain{}{\textsl{\rightmark}}}
94 \fancyhead[RE]{\fancyplain{}{\textsl{\leftmark}}}
95 \fancyhead[RO]{\textrm\thepage}
96 \chead{} \lfoot{} \rfoot{} \cfoot{}
97 \pagestyle{fancy}
98 \fancypagestyle{plain}{
99   \fancyhf{}
100  \fancyhead[OR]{\thepage}
101  \renewcommand{\headrulewidth}{0pt}
102 }

```

`\chaptermark` Redefine `chaptermark` and `sectionmark` to set up the correct header name and
`\sectionmark` produce a banner on the output making the location of messages simpler.
`\subsectionmark` The `\btypeout` command is for console logging where chapters start
`\chapapp` expands to "Chapter" or "Appendix"

```

103 (*thesis | minithesis | progress | project | report | gdp)
104 \renewcommand{\chaptermark}[1]{\btypeout{\thechapter.\space #1}\markboth{\chaptername\ \thechapter}{\thechapter}}
105 \renewcommand{\sectionmark}[1]{\markright{\thesection.\hspace{1em}#1}}
106 \renewcommand{\subsectionmark}[1]{}
107 </thesis | minithesis | progress | project | report | gdp)
108 (*article)
109 \renewcommand{\sectionmark}[1]{\btypeout{\thesection\hspace{1em}}\markboth{}{\thesection.\hspace{1em}#1}}
110 \renewcommand{\subsectionmark}[1]{}
111 \renewcommand{\subsubsectionmark}[1]{}
112 </article)
113 (gdpsummary)\markboth{GDP Summary Report}{GDP Summary Report}

```

`\cleardoublepage` Redefine `cleardoublepage` to remove headers from blank pages in twosided documents.

```

114 \def\cleardoublepage{\clearpage\if@twoside \ifodd\c@page\else
115 \hbox{}
116 \thispagestyle{empty}
117 \newpage
118 \if@twocolumn\hbox{}\newpage\fi\fi\fi}

```

`\cleartoeven` Define `cleartoeven` to remove headers from blank pages and force to even page for appendix or index.

```

119 \def\cleartoeven{\clearpage\if@twoside \ifodd\c@page
120 \hbox{}
121 \thispagestyle{empty}
122 \newpage
123 \if@twocolumn\hbox{}\newpage\fi\fi\fi}

```

5.6 Mathematics

Load the `amsmath` packages, so we can do some serious math, and setup the theorem environments.

```

124 %% ----- Figure/Table/Eq/Listing Styling -----
125 %% Set the styling for non text elements of the document
126 \usepackage{amsmath,amsfonts,amssymb,amscd,amsthm,xspace}
127 \theoremstyle{plain}
128 (*thesis | minithesis | progress | project | report | gdp)
129 \newtheorem{example}{Example}[chapter]
130 \newtheorem{theorem}{Theorem}[chapter]
131 (/thesis | minithesis | progress | project | report | gdp)
132 (*article | gdpsummary)
133 \newtheorem{example}{Example}[section]
134 \newtheorem{theorem}{Theorem}[section]
135 (/article | gdpsummary)
136 \newtheorem{corollary}[theorem]{Corollary}
137 \newtheorem{lemma}[theorem]{Lemma}
138 \newtheorem{proposition}[theorem]{Proposition}
139 \newtheorem{axiom}[theorem]{Axiom}
140 \theoremstyle{definition}
141 \newtheorem{definition}[theorem]{Definition}
142 \theoremstyle{remark}
143 \newtheorem{remark}[theorem]{Remark}

```

5.7 Captions

`\fref` Load the `caption` package to improve formatting of captions, and provide short
`\tref` referencing commands.

```

\eref 144 \usepackage[justification=centerlast,font=small,labelfont=sc]{caption}
\cref 145 \setlength{\captionmargin}{20pt}
\sref 146 \newcommand{\fref}[1]{Figure~\ref{#1}}
\aref 147 \newcommand{\tref}[1]{Table~\ref{#1}}
148 \newcommand{\eref}[1]{Equation~\ref{#1}}
149 \newcommand{\cref}[1]{Chapter~\ref{#1}}
150 \newcommand{\sref}[1]{Section~\ref{#1}}
151 \newcommand{\aref}[1]{Appendix~\ref{#1}}

```

5.8 Float Placement

`\topfraction` Preventing figures from appearing on a page by themselves. L^AT_EX's figure placement algorithm is quite biased in favour of putting figures on a page by themselves, instead of on the top of a page with some text below it. Fortunately, the parameters of the algorithm can be changed. The main problem is that L^AT_EX per default only allows a part of the top of a text-page (70%) to contain figures, and requires at least 20% of a page to be text when text and figures share a page. These parameters should be set to more reasonable values, for example 85% and 10%.

```
152 \renewcommand{\topfraction}{0.85}
153 \renewcommand{\bottomfraction}{.85}
154 \renewcommand{\textfraction}{0.1}
155 \renewcommand{\dbltopfraction}{.85}
```

`\floatpagefraction` This helps, but sometimes L^AT_EX puts a figure on a page by itself, although it would fit perfectly well on the top of a page. This happens when the figure will not fit on the page where it was defined. L^AT_EX then attempts to put it on a figures-only page before it attempts to put it at the top of the next page. A page may contain figures alone if the figure(s) use at least half the page. To prevent half-empty pages this limit should probably be increased to around 75%.

```
156 \renewcommand{\floatpagefraction}{0.75}
157 \renewcommand{\dblfloatpagefraction}{.75}
```

Be careful not to make `floatpagefraction` larger than `topfraction`, then you risk to produce a figure that can neither go on the top of a text page, nor on a page by itself. If that happens, the figure and all later figures will be postponed until next time a `clearpage` is executed (typically at the end of a chapter or the end of the document). This will also happen if a figure is too large to fit on a page.

```
158 \setcounter{topnumber}{9}
159 \setcounter{bottomnumber}{9}
160 \setcounter{totalnumber}{20}
161 \setcounter{dbltopnumber}{9}
```

5.9 Graphics

Load the `graphicx` package, so we can include pictures easily. Load the `epstopdf`, so that eps files are automatically converted to pdf when pdfL^AT_EX is used. This requires a version of `epstopdf` to be installed on you system. You can find a windows version at

<http://www.ctan.org/tex-archive/support/epstopdf/epstopdf.exe>.

```
162 \usepackage{graphicx}
163 \usepackage{epstopdf}
```

5.10 Subfigures and subtables

Load the `subcaption` package, so we can include subfigures easily.

```
164 \usepackage[] {subcaption}
165 \usepackage{booktabs}
166 \usepackage{rotating}
```

5.11 Listings

Load the listings package, so we can include listings easily.

```
167 \usepackage{listings}
168 % \usepackage{lstpatch}
169 \lstset{captionpos=b,
170         frame=tb,
171         basicstyle=\scriptsize\ttfamily,
172         showstringspaces=false,
173         keepspaces=true}
174 \lstdefinestyle{matlab} {
175     language=Matlab,
176     keywordstyle=\color{blue},
177     commentstyle=\color[rgb]{0.13,0.55,0.13}\em,
178     stringstyle=\color[rgb]{0.7,0,0} }
```

5.12 Hyperlinks

Load the hyperref package to provide hyperlinks in pdf and dvi documents.

```
179 \usepackage[pdfpagemode={UseOutlines},bookmarks=true,bookmarksopen=true,
180     bookmarksopenlevel=0,bookmarksnumbered=true,hypertextnames=false,
181     colorlinks,linkcolor={linkBlue},citecolor={linkBlue},urlcolor={linkBlue},
182     pdfstartview={FitV},unicode,breaklinks=true]{hyperref}
183 \pdfstringdefDisableCommands{
184     \let\\\space
185 }
```

6 Internal Names

<code>\supervisor</code>	The various elements of the documents are defined as control sequences to make
<code>\examiner</code>	it easy to customize this style for other parts of the University.
<code>\degree</code>	186 %% ----- Organisational Structure -----
<code>\authors</code>	187 \newcommand*\supervisor[2] [] {\def\supname{#2}\def\supplural{#1}}
<code>\addresses</code>	188 \newcommand*\examiner[2] [] {\def\examname{#2}\examplural{#1}}
<code>\university</code>	189 \newcommand*\degree[1] {\def\degreename{#1}}
<code>\UNIVERSITY</code>	190 \newcommand*\authors[1] {\def\authornames{#1}}
<code>\department</code>	191 \newcommand*\qualifications[1] {\def\quals{#1}}
<code>\DEPARTMENT</code>	192 \newcommand*\addresses[1] {\def\addressnames{#1}}
<code>\group</code>	193 \newcommand*\doi[1] {\def\doicode{#1}}
<code>\GROUP</code>	194 \newcommand*\volume[2] {\def\volno{#1}\def\volof{#2}}
<code>\faculty</code>	195 \newcommand*\orcidid[1] {\def\orcid{#1}}
<code>\FACULTY</code>	196 \newcommand*\university[1] {\def\univname{#1}}
<code>\subject</code>	197 \newcommand*\UNIVERSITY[1] {\def\UNIVNAME{#1}}
<code>\keywords</code>	198 \newcommand*\department[1] {\def\deptname{#1}}
	199 \newcommand*\DEPARTMENT[1] {\def\DEPTNAME{#1}}
	200 \newcommand*\group[1] {\def\groupname{#1}}
	201 \newcommand*\GROUP[1] {\def\GROUPNAME{#1}}

7.3 Contents Pages

7.3.1 Add to Table of Contents

`\addtotoc` Ensures numbering for sub-subsections in the table of contents, and provide for 6 levels to appear in toc. Define `addtotoc` to enable adding elements to the toc at chapter level, using a dummy counter to fix bookmarks in pdfL^AT_EX.

```

569 (*thesis | minithesis | progress | project | report | gdp | article)
570 \addtocounter{secnumdepth}{1}
571 \setcounter{tocdepth}{6}
572 \newcounter{dummy}
573 \newcommand\addtotoc[1]{
574 \refstepcounter{dummy}
575 (*thesis | minithesis | progress | project | report | gdp)
576 \addcontentsline{toc}{chapter}{#1}}
577 </thesis | minithesis | progress | project | report | gdp)
578 (*article)
579 \addcontentsline{toc}{section}{#1}}
580 </article>

```

7.3.2 Table of Contents

`\tableofcontents` Adjust line and paragraph spacing.

```

581 \renewcommand\tableofcontents{
582 \hypersetup{linkcolor={black}}
583 \btypeout{Table of Contents}
584 \begin{spacing}{1}{
585     \setlength{\parskip}{1pt}

959 You probably found all the files from \cite{Gunn:2001:pdflatex}.
960 \tref{Table:tabex} illustrates the results of my work.
961 \begin{table}[!htb]
962   \centering
963   \begin{tabular}{cc}
964     \toprule
965     \textbf{Training Error} & \textbf{Testing Error} \\
966     \midrule
967     0 & \infty \\
968     \bottomrule
969   \end{tabular}
970   \caption{The Results}
971   \label{Table:tabex}
972 \end{table}
973
974 \fref{Figure:figex} shows why this is the case.
975 \begin{figure}[!htb]
976   \centering
977   \includegraphics[width=8cm]{figure}
978   \caption{A colourful picture.}
979   \label{Figure:figex}
