Objectives		Week to start	Time it takes	Week No.												
				1	2	3	4	5	6	7	8	9	10	11	12	13
Project Brief	Brief	1	2													
Background research	Overall	1	3													
	Research on XSS attack	1	1													
	choose XSS attack script to use	2	1													
	Choose the vulnerable web application	3	1													
Test environment set up	Overall	3	3													
	Create virtual machine	3	1													
	Attack machine – attack script installs	3	2													
	Target machine - web application setup	5	1													
	Run test with no detection tool	5	1													
Implementation of the detection tool	Overall	6	5													
	Command line interface	6	1													
	Listen to port	7	1													
	Requests checking	8	1													
	Create request data	8	1													
	Store request data	9	1													
	Review requests data	9	1													
	Timing for request frequency	10	2													
	Notification	10	1													
Testing and result analysis	Overall	10	2													
	Run test with detection tool on server side	10	1													
	Compare and analyze the result	11	1													
demonstration	PPT	11	2													
dissertation	thesis	4	10
